

Dr. Patrick Diehl

Curriculum Vitæ

Education

- 2017 **PhD**, *Applied mathematics*, University of Bonn, Germany.
2012 **Diploma**, *Computer Science*, University of Stuttgart, Germany.

Research experience

- 10/18–current **Research scientist**, *Center for Computation & Technology*, Louisiana State University.
- 02/17–09/18 **Postdoctoral fellow**, *Laboratory of Multiscale Mechanics*, Polytechnique Montréal.
- o Benchmark peridynamic simulations against experimental data for composite materials
 - o Extracting constitutive mechanical parameters in linear elasticity using the virtual fields method within the ordinary state-based peridynamic framework (with Rolland Delorme)
 - o Hybrid image processing approach for crack area detection and tracking using local Digital Image Correlation results (with Ilyass Tabiai)
- 04/13–01/17 **Research Assistant**, *Institute for Numerical Simulation*, University Bonn.
- o Modeling and simulation of crack and fractures in solids using peridynamic
- 07/12–03/13 **Research Assistant**, *Institute for Simulation of large Systems*, University Stuttgart.

Visiting positions

- 2015 **Guest Research Assistant**, *Center for Computation and Technology*, Louisiana State University.

Certificates

- Baden–Württemberg Certificate
Certificate for successful completion of the program in higher education pedagogy by the center for educational development of the state of Baden–Württemberg.

Research Interests

Digital Media Center, 340 E Parker Blvd – Baton Rouge, LA 70803, USA
☎ +1 (225) 578 5061 • ✉ patrickdiehl@lsu.edu • 🌐 www.diehlpk.de
🐦 [diehlpk](#) • 📺 [diehlpk](#) • 📞 0000-0003-3922-8419

- Computational engineering
 - o Peridynamics theory for the application in solids, like glassy or composite materials,
 - o Validation and verification of simulations against experimental data,
 - o Assembly of experimental data for comparison with simulations,
 - o Application of machine learning to experiments and simulations.
- High Performance Computing
 - o The C++ Standard Library for Parallelism and Concurrency (HPX),
 - o Asynchronous many task systems and there application in computational engineering.
- Open science
 - o Open Source Software for scientific applications,
 - o Open data for sharing raw experimental results.

Patrick Diehl. An overview for coupling finite elements with peridynamics. International Congress on Industrial and Applied Mathematics, 15.07-19.07 2019, Valencia, Spain.

Thesis

Patrick Diehl. Implementierung eines Peridynamik-Verfahrens auf GPU. Diplomarbeit, Institute of Parallel and Distributed Systems, University of Stuttgart, 2012.

Patrick Diehl. *Modelling and Simulation of cracks and fractures with peridynamics in brittle materials*. Doktorarbeit, University of Bonn, 2017.

Raw experimental data

Ilyass Tabiai, Rolland Delorme, Patrick Diehl, Louis Laberge Lebel, and Martin Levesque. PMMA 3 point bending test until failure loaded in displacement, February 2018.

Organization of Conferences, Workshops and Symposia

- Symposia
 - o Modeling and Simulation for Complex Material Behavior, 14th U.S. National Congress on Computational Mechanics, Link.
 - o Peridynamic theory and multiscale methods for complex material behavior, 14th World Congress on Computational Mechanics (WCCM XIV)
- Workshops
 - o Workshop on Experimental and Computational Fracture Mechanics: Validating peridynamics and phase field models for fracture prediction and experimental design, Link. Sponsored by
 - US Association for Computational Mechanics,
 - Center for Computation & Technology at Louisiana State University,
 - Oak Ridge National Laboratory,
 - Society for Experimental Mechanics.

Professional Organizations

- o Society for Industrial and Applied Mathematics (SIAM)
- o Informatik-Forum Stuttgart e. V.
